

CAT PUMPS CRANKCASE OIL

Specially Formulated Oil for Cat Pumps

At Cat Pumps UK we have over 40 years' experience in the supply of our high-pressure triplex plunger and piston pumps. In order to ensure the reliability and long life associated with Cat Pumps, we recommend the crankcase is filled with Cat Pumps Crankcase Oil.

Cat Pumps Crankcase Oil is a mineral-based hydraulic oil containing advanced additive packs, specially formulated for Cat Pumps high-pressure pumps.

Why Cat Pumps Crankcase Oil?

- Cat Pumps controls the specially formulated blend of the mineral oil to ensure the most appropriate additives, at the correct amount, are within the blend. Commercially available mineral oils may not have these additives.
- The oil is formulated to ensure maximum protection for the pump against wear, oxidation, rust and corrosion.
- Convenient supply from stock in handy 4 or 1 litre containers.

To ensure that your pump does not suffer short life through wear or corrosion always use Cat Pumps Crankcase Oil.

Excessive wear on a pump plunger rod

Part Number	Description
6132	Cat Pumps Crankcase Oil 1 Litre
6133	Cat Pumps Crankcase Oil 4 Litre
